Projects

Bawarchi

Bawarchi is a React Native and Node.js-powered food delivery app.

It allows users to register as Customers, Kitchens or Riders. It provides kitchen browsing, order placement, order management, reviews, menu management, pick and deliver orders and an Admin for user management.

DollarWala

DollarWala is a Full Stack Ecommerce site that features user authentication, verification through nodemailer, product browsing by categories, shop reviews, product reviews, order history and secure checkout and payment integration using stripe. All items are for 1 dollar.

It includes a separate Admin Panel for product, order and user management.

OFF

OFF is a React Native Full Stack Ecommerce Clothing App that features user authentication, verification, brands and their products browsing, order placement and history.

This project includes Brand panel for their product management and Super Admin Panel for user and brand management made in React.js .

POS Inventory System

A modern Point On Sale Inventory system using React.js integrated with node.js. It has two roles, Admin and Cashier.

Admin can process sales, manage real-time inventory, manage employees and their salaries, add products to cart by scanning barcodes, generates invoices and view analytics. Cashiers have limited access.

BrandSense (FYP)

Brandsense is an influencer marketing platform developed using React.js where brands and influencers connect through PR Agencies and run campaigns.
